

Harlequin Activity™

Harlequin Activity is a fully floating sprung floor system using Harlequin's proprietary 'triple sandwich' construction method. The layers provide consistent shock dampening across the floor and offer the same feel and energy return to one or several dancers. There are no fixings to the walls or subfloor and it is suitable for all genres of dance.

Performance surface: Harlequin Activity can be used with a variety of performance surface options from the Harlequin range of performance vinyls and solid or engineered wood finishes.

Installation: Harlequin Activity is designed for permanent installation and can be laid on any smooth flat surface without prior preparation. The system can be adapted to withstand heavy loading including retractable seating.

 All Harlequin wooden sprung floors are 100% recyclable.

 Harlequin sprung floor panel systems are extremely durable and are designed to be reused many times.
