

Case Study

Phoenix House International School

Overview

The Phoenix House International School in Tokyo is a school offering a creative and innovative British style education within the rich cultural context of Japan. Opened in August 2021, it is the first international school in Japan to adopt Harlequin's sprung floor system.

“Phoenix House values an enriched approach to education, providing pupils with a wide range of opportunities including the Performing Arts. It was therefore crucial for us to have a well equipped dance studio to not only offer our pupils a safe and professional space to practice and rehearse, but also to inspire their creativity. We are truly delighted with the high quality to which Harlequin Floors delivered their service.”

Claire Fletcher
Head of School

Choice of product

Harlequin Cascade

Harlequin Cascade vinyl performance surface with BioCote Antimicrobial Protection is the ultimate heavy-duty vinyl, with mineral fibre reinforcement for stability and durability. It is widely used as a ballet floor, but is also a popular choice for many other dance styles.

With proven antibacterial properties, it helps keep the floor hygienically clean.

Harlequin Flexity

Harlequin Flexity is a cost-effective, self-install sprung floor panel system. 'Industry standard' choice for permanent or semi-permanent self-installation.
